The photographs below show two animals, X and Y.

Animal X

Animal Y

Which of the following statements about animals X and Y is/are correct?

(1) Both are vertebrates.
(2) Both have lungs for gas exchange.
(3) Both are ectotherms.

A. (1) only
B. (2) only
C. (1) and (2)
D. (1) and (3)

☐

The diagram below shows the structure of a typical fish.

© 2020 Aristo Educational Press Ltd.

The photograph below shows a fish.

[**Photo source:** Oliver Selz / CC-BY-SA-3.0]

The key below can be used to identify the fish shown.

1a Dorsal and caudal fins separated ..... go to 2
1b Dorsal and caudal fins combined ..... W
2a Fins with spots X
2b Fins without spots ..... go to 3
3a Upper mandible longer than lower mandible ..... Y
3b Lower mandible longer than upper mandible ..... Z

The fish shown in the photograph is

A. W.
B. X.
C. Y.
D. Z.

Which of the following are the common features of Y and Z?

(1) Their bodies are covered with hair.
(2) They carry out internal fertilization.
(3) They can maintain a constant body temperature.

A. (1) and (2) only
B. (1) and (3) only
C. (2) and (3) only
D. (1), (2) and (3)

Which of the following statements about mammals are correct?

(1) All of them have lungs for breathing.
(2) All of them are terrestrial.
(3) All of them possess mammary glands.

A. (1) and (2) only
B. (1) and (3) only
C. (2) and (3) only
D. (1), (2) and (3)

Directions: The following two questions refer to the table below, which lists some features of three plants, P, Q and R.

	P	***Q***	***R***
Seeds	−	+	+
Flowers	−	+	−
Vascular tissues	+	+	+

Key: '+' = present '−'= absent

What can P, Q and R be?

	P	***Q***	***R***
A.	fern	pine	apple
B.	fern	apple	pine
C.	moss	pine	grass
D.	moss	grass	pine

Which of plants P, Q and R produce(s) cones for reproduction?

A. P only
B. Q only
C. R only
D. Q and R only

Which of the following statements about these aquatic organisms is/are correct?

(1) They can carry out photosynthesis.
(2) They are eukaryotic.
(3) They belong to the kingdom Plantae.

A. (1) only
B. (1) and (2) only
C. (2) and (3) only
D. (1), (2) and (3)

The photomicrographs below show four kinds of organisms.

W

X

Y

Z

Which two organisms have the closest phylogenetic relationship?

A. W and Y
B. W and Z
C. X and Y
D. X and Z

Which of the following statements about archaebacteria is ***incorrect***?

A. They are unicellular.
B. They have a cell membrane.
C. They belong to the domain Bacteria.
D. They are prokaryotes.

The table below shows the classification of four animals.

	Animal 1	***Animal 2***	***Animal 3***	***Animal 4***
Phylum	Chordata	Chordata	Chordata	Chordata
Class	Aves	Aves	Aves	Aves
Order	Galliformes	Piciformes	Galliformes	Piciformes
Family	Phasianidae	Picidae	Phasianidae	Picidae
Genus	*Gallus*	*Sphyrapicus*	*Gallus*	*Picus*
Species	*G. gallus*	*S. varius*	*G. varius*	*P. viridis*

Which two organisms are the ***most*** closely related?

A. animals 1 and 2
B. animals 1 and 3
C. animals 2 and 3
D. animals 2 and 4

P

Q

Which of the following comparisons between plants P and Q is correct?

	P	***Q***
A.	has parallel-veined leaves	has net-veined leaves
B.	has one cotyledon in the seeds	has two cotyledon in the seeds
C.	has naked seeds	seeds enclosed in fruits
D.	insect pollinated	wind pollinated

Bacteria and archaebacteria are classified in different domains because

(1) archaebacteria are smaller than bacteria.
(2) the cell walls of bacteria are made of peptidoglycan while the cell walls of archaebacteria are not.
(3) archaebacteria are more closely related to eukaryotes than prokaryotes.

A. (1) only
B. (1) and (2) only
C. (2) and (3) only
D. (1), (2) and (3)
